09.02.2016 – RELOCATION OF THE NEW GONDOLA'S ARRIVAL STATION

Isenau 2017, it means a new gondola to preserve this special place for families

The foundation for the preservation of Isenau's interests commits to improve and develop public and tourist use of Isenau area all year round.

For this reason, it supports the Télévillars-Gryon-Diablerets project to ensure the long-term existence of Isenau area through the modernisation and relocation of the new gondola's arrival station. This project will be very beneficial for skiers, walkers and bikers as it provides easy access to beginner slopes and new facilities such as toilets, a ski room, snack bar etc. Moreover, thanks to the installation of a moving walkway of 150 metres, pedestrians and novice skiers will have easy access to the restaurant. Additional costs relating to the relocation of the arrival station will be entirely assumed by Télévillars-Gryon-Diablerets.

Indeed, this project is essential for the tourist and economical development of the region; this is why we require your help **to renew the actual gondola.**

This last will only become reality in 2017 if we work together!

**It is imperative that we collect
CHF 4 million by 30th August 2016.
Your donation is important.**

Stay tuned with the Foundation and donate on www.myisenau.ch
